

QUICK VIEW CARD

The Tilt 360[®] Leadership Predictor is a strength-based 360[°] interview tool that provides leaders with specific insight on current skills and effectiveness. The goal is to increase leadership presence and creating a positive social climate for innovation.

Each of the four META-FACTORS of leadership are determined by three corresponding CORE STRENGTHS which are measured by ratings in twelve COMMENDABLE TRAITS, for a total of 48 separate ratings in the 360[°] interview. When ratings are combined and placed upon the Leadership Predictor, one of four leadership TILTS comes into focus. All this gives a leader the necessary data for keen self-awareness, useful for broad perspective as well as for fine-tuning leadership skills.

THE 4 TILTS

Leading with
